- github.com/bomberkill

Skills

Front-end

React, Next.js, React Native, Tailwind, Mantine, shadcn/ui, Refine

Back-end

Node.js, NestJS, GraphQL, REST

Languages

TypeScript, JavaScript, HTML, CSS

Data & State

PostgreSQL, MongoDB, Prisma, Redis · Redux, MobX-State-Tree, Zustand

Cloud & DevOps

Firebase, Supabase, Cloudflare Workers, Docker, Vercel

Education

B.Tech, Systems & Network Administration

IUT of Douala · 2021–2022

University Diploma, Computer Engineering

IUT of Douala · 2019–2021

Professional Summary

Full-stack developer and CTO with 4+ years building high-performance web and mobile applications end to end. Specializes in React, Next.js, React Native, and Node.js / NestJS back-ends, delivering scalable SaaS platforms, secure APIs, and cloud infrastructure. Pairs hands-on engineering with technical leadership to ship reliable products in fast-moving environments.

Work Experience

Chief Technology Officer (CTO)

Sep 2025 – Present

ReachDem

- Lead technical strategy and product architecture for a SaaS platform spanning messaging, campaign management, and billing.
- Designed backend APIs, asynchronous worker pipelines, and SMS / email / payment provider integrations for reliable high-volume delivery.
- Established data modeling, application security, and cloud deployment standards, owning third-party integrations and platform scalability.

Front-End Developer

Sep 2022 – Jan 2025

Nobisoft · Douala

- Developed web and mobile applications with a focus on performance optimization and user experience.
- Engineered secure, scalable Firebase back-ends: authentication, real-time database, and serverless deployment.
- Delivered the full project lifecycle from design to production, including post-launch maintenance and updates.
- Collaborated with product, design, and marketing teams; trained and mentored new interns on core technologies.

Web Development Intern

Jun 2022 – Sep 2022

Nobisoft · Douala

- Built responsive, optimized web pages with HTML, CSS, and JavaScript, adding interactive functionality.
- Partnered with the development team to improve UI/UX; tested and debugged to ensure code quality.

Projects

ReachDem — Customer engagement SaaS

Built a customer-engagement platform for SMS & email campaigns with link tracking, analytics, asynchronous worker orchestration, and provider-agnostic payments secured by webhooks.

TypeScript Next.js Prisma PostgreSQL Cloudflare Workers Stripe

Healthcare Social Network — Full-stack platform

Delivered a full-stack platform (Next.js PWA, NestJS GraphQL API, Refine admin) with authentication, role-based access, organization management, multilingual support, and secure media storage.

Next.js NestJS GraphQL Refine MongoDB

SmsBroadcast — AI-powered SMS marketing

Engineered a mobile app for large-scale SMS campaigns with on-device AI copy generation (Gemini Nano) and custom Android native modules for high-volume background delivery.

React Native Gemini Nano Native Android Zustand

Fast Invoice — Offline-first invoicing

Developed an offline-first invoicing app on a SQLite architecture with instant PDF generation, AdMob monetization, and optimized form workflows for fast, accurate data entry.

React Native Expo SQLite Zod

Unified Ecosystem API — Multi-tenant backend

Architected a multi-tenant backend (NestJS) powering several apps with JWT + RBAC security, NotchPay subscriptions, and scalable MongoDB structures with tenant isolation.

NestJS MongoDB JWT NotchPay
